L11 ANSWER 1 OF 4 CAPLUS COPYRIGHT 2001 ACS

AB Compds. and methods are described for mitigating neurodegeneration, effecting neuroprotection, and/or effecting cognition enhancement. Neurol. or cognitive conditions are treated by administering to a subject an effective amt. of a therapeutic compd. comprising a nitrate ester, or a

pharmaceutically acceptable salt or ester thereof.

ACCESSION NUMBER: 2000:666584 CAPLUS

DOCUMENT NUMBER: 133:232855

TITLE: Nitrate esters, their preparation, and their use for treatment of neurological conditions

AB Aliph. nitrate esters having a sulfur or phosphorus atom .beta. or .gamma.

to a nitrate group and their congeners having efficacy as neuroprotective agents are described. Preferred nitrate esters may be synthesized by nitration of a 3-bromo-1,2-propanediol, and subsequent reaction to yield the desired mono-, di- or tetra-nitrate ester.

AB Title compds. O2NO-E-F-G [E, F, G = org. radicals; F, G = unsubstituted, unsubstituted pyridyl; when E = alkyl, F, G = not both alkyl radicals bearing nitrate groups or an O linkage; I] were prepd. Examples include 7 bioassays and 13 synthetic examples. E.g., 2',3'-dideoxy-3-thiocytosine was nitrated (Ac2O, HNO3, -30.degree.C, 10 min) gave II in 52% yield. Certain examples I were shown to activate guanylyl cyclase. The invention is useful for treatment of neurol. or cognitive conditions.

AB Methods and therapeutic compds. for treating pain, mitigating inflammation, effecting analgesia and/or effecting sedation in a subject are described. A subject is administered an effective amt. of a therapeutic compd., e.g. 4-methylthiazole-5-Et nitrate (I), which is a nitrate ester. I shows a mean of 54.21 s at 10 mg/kg in scopolamine-impaired learning assay. Novel pharmaceutical compns. are also described.

L7 ANSWER 1 OF 2 CAPLUS COPYRIGHT 2003 ACS

AB NO is produced endogenously from arginine by the action of NO synthase, and exogenously by nitrovasodilators, including org. nitrates and nitrites. NO has been proposed as a cytotoxic and cytoprotective agent. There is strong evidence that NO acts as an apparent antioxidant in inhibiting lipid peroxidn., via chain termination, and interestingly lipid nitrates and nitrites have been proposed to be products of this chain termination. Both pro- and antioxidant mechanisms may be drawn for nitrates and nitrites; therefore, their effects on lipid peroxidn. were measured in two systems, using tocopherol, thiol, and an NO donor for comparison: (1) rat cerebrocortical synaptosomes with Fe(II)-induced lipid peroxidn. measured by thiobarbituric acid reactive substances (TBARS), and (2) phospholipid liposomes with an azo-initiator induction system, quantified by a fluorescent probe of peroxide formation. In contrast to the classical nitrate nitroglycerin, novel nitrates which release NO on reaction with thiols and two novel nitrates which spontaneously generate NO in aq. soln. inhibited lipid peroxidn. I-Amyl nitrite inhibited lipid peroxidn., and its properties were further studied with ESR spectroscopy. The data show that classical nitrites and novel nitrates are not prooxidants, but inhibit lipid peroxidn.

L12 ANSWER 1 OF 1 CAPLUS COPYRIGHT 2003 ACS

AB Methods and therapeutic compds. for treating pain, mitigating inflammation, effecting analgesia and/or effecting **sedation** in a subject are described. A subject is administered an effective amt. of a therapeutic compd., e.g. 4-methylthiazole-5-Et nitrate (I), which is a nitrate ester. I shows a mean of 54.21 s at 10 mg/kg in scopolamine-impaired learning assay. Novel pharmaceutical compns. are also described.
